

710K-RCS

- power to lift

Loading group HC1/HD5/B3		710-K1	710-K2	710-K3	710-K4
Type				K-RCS	
TECHNICAL DATA					
Load moment	tm	6.2	6.1	5.8	5.7
Hydraulic reach	m	5.2	7.1	8.9	10.8
Slewing torque	kgm		840		
Slewing angle	°		400		
Working pressure	bar		335		
Weight excl. stabilizer legs	kg	655	730	800	860
Weight of stabilizer legs, standard	kg		120		
Pump performance	l/min		50		
Oil capacity in tank fitted on crane	l		50		
Power consumption	kW		28		
GEOMETRY					
Height above mounting surface	mm	1840	1840	1860	1895
Width, folded	mm		2100		
Length of crane, no extra valves	mm		661		
Length with 2 extra valves in internal hose reel	mm		661		
Single Power Plus link arm system			Basic		
Over-bending on crane	°		15		
Hook height 1 m from column	m	2.53	2.44	2.36	2.27
Control mode					
RADIO REMOTE CONTROL OF CRANE				BASIC	
Manual operation of stabilizer functions				Basic	
Remote control box with HMF InfoCentre				Option	
Remote control box, linear control levers (L) or joysticks (J)				L / J	
CONTROLS					
RCL 5300 Safety System				Basic	
Control valve type (RC) for crane operation				Basic	
Control valve type (-h) for operation of stabilizer legs and beams				Basic	
HDL speed adaptation system				Basic	
OPTIONS: HYDRAULIC EQUIPMENT					
Hydraulically extensible stabilizer beam				Option	
1000 kg hydraulic hoist on the crane				Option	
Extra valves in hose guides				Option	
Extra valves in hose reels internally in the jib extensions				Option	
Extra valves in external hose reels				Option	
2 available functions (not with hydraulically extensible stabilizer beam)				Option	
2 or 4 radio remote controlled stabilizer functions				Option	
Biodegradable oil				Option	
50 l oil tank mounted on the crane				Option	
OTHER EQUIPMENT		710-K1	710-K2	710-K3	710-K4
Number of manual extensions		1	1	1	1
Fixed or variable flow pump				Option	
Work light on crane				Option	
Work light operated from the remote control box				Option	
Fixed stabilizer legs type V				Option	
Manual swing-up stabilizer leg, type R 45°, 90°, 135°, 180°				Option	
Swing-up stabilizer leg, type GR 45°, 90°, 135°, 180° with gas spring				Option	
Mechanical limitation of the slewing area 210°				Option	

Oil Regeneration System

A particular hydraulic valve on the hydraulic extensions of the crane optimises the speed of the extension system.

Excellent Power-to-Weight Ratio

Very low tare weight combined with high lifting capacity for high loading capacity and efficiency during loading and unloading.

HMF RCL 5300

The safety system monitors the load moment of the crane as well as the vehicle stability and thereby, the safety of the crane operator.

Single Link Arm System

The HMF single Power Plus link arm system has an excellent lifting capacity at long reach and works particularly fast when loading and unloading with grab.

Radio remote controlled Stabilizer Legs

All stabilizer functions (option) can be operated from the remote control box, which is fitted with an HMF InfoCentre. A stabilizer icon appears on the display of the HMF InfoCentre, and it is possible to operate the stabilizer beams and stabilizer cylinders. This makes operation with the stabilizers easier, faster and safer, and the operator has an unobstructed view of all movements.

Adaptable Stabilizer Solutions

The crane's stabilizer legs are robust, easy to handle and require minimum space. You can choose between fixed stabilizer legs or manual swing-up stabilizer legs (45°, 90°, 135°, 180°) with or without gas spring. The stabilizer cylinder is adjustable by +/- 200 mm in height, with full stroke.

HMF Radio Remote Control type RC

(Remote Control)
HMF radio remote control provides the operator with all advantages and possibilities for remote control of the crane functions and important safety functions. The crane operator can move in the entire working area and can at any time position himself optimally and safely in relation to the lifting task. The crane is equipped with the HDL system which automatically adapts the crane speed to the working situation when it is exposed to a lot of stress.

Internal Hose Routing

Internal hose routing both through the column and stabilizer beams gives the crane an elegant design which also provides maximum protection for the hoses from wear, sunlight and other mechanical stress.
