

We build a better future

■ Photo may include optional equipment.

50/60/70DS-7E

DIESEL FORKLIFT TRUCKS Environmental - Friendly

50/60/70DS -7E

New criterion of Forklift Trucks

Hyundai introduces a new line of 7E-series diesel forklift trucks. Excellent power and performance make your business more profitable.

■ Photo may include optional equipment.

High Power & Performance

Powerful Engine

MHI S6S-T Engine

The six cylinders turbo-charged engine is built for power, reliability and economy. This engine meets EPA tier III and EU stage IIIA emission regulation.

68 kW / 2,300 rpm

State-of-the-art hydraulic system

The latest designed, large-capacity hydraulic system including a low-noise control valve shortens reaction time during operation and improves both efficiency and durability.

Fast and stable performance

Being able to quickly raise and lower the mast, as well as tilting forward and backward, the truck provides you the best operational conditions during loading/unloading operations. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve.

The new master on your job-site!

Smooth running, efficient and ergonomically designed, 50/60/70DS-7E series are made to meet your needs.

■ Photo may include optional equipment.

Faster Travel Speed & Grade-ability

The powerful high-output engine provides greater acceleration, better grade-ability and faster travel speed on any tough terrain or slope.

Grade-ability (Loaded)

50DS-7E	46.2%
60DS-7E	40.7%
70DS-7E	36.5%

Travel speed (Unloaded)

50DS-7E	35.5 km/h
60DS-7E	35.4 km/h
70DS-7E	35.2 km/h

Increased mast tilting angle

Utilizing the mast tilting angle of 15 degrees forward and 10 degrees backward gives the operator a safe and rapid platform for loading and unloading jobs.

Wet disc brake system

Wet disc brakes improve the brake performance and make your service intervals longer. Enclosed brakes are protected against dust and water.

Fully hydrostatic power steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and steering wheel kick-back.

OPSS (Operator Presence Sensing System)

Mast tilting, lifting and lowering operation is not possible when the operator is not seated in normal position. (Option)

Comfortable Operation

Adjustable steering wheel

Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and safe shift lever

A single lever on the left side of the steering column gives the operator fast and easy control of speed and travel direction. The engine can only be started in case of neutral position of this lever.

Multi-function switch lever

A multi-functional switch lever gives easy access to lights and horn.

Quick Response of Operating Control Levers

Only minimal operator's effort is required for precise, safe and productive control.

■ Photo may include optional equipment.

Ergonomically positioned pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for operator's convenience. Easy to remove and easy to clean cleanable rubber floor mat.

Cup holder & console box

Additional storage spaces are located inside the operating space for operator's convenience.

Comfortable Operation!

A design based on human engineering relieves fatigue and increases operator's efficiency.

New high visibility for safe operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

Operator friendly gauges and water-resistant monitor panel

- 1 Parking brake lamp
- 2 Directional indicators
- 3 Fuel warning lamp
- 4 Engine oil warning lamp
- 5 Transmission oil temperature warning lamp
- 6 Battery warning lamp
- 7 Air filter warning light
- 8 Working light indicator
- 9 Water separator lamp
- 10 Pre-heater indicator
- 11 Water temperature gauge
- 12 Fuel gauge
- 13 Hour meter
- 14 Engine check lamp
- 15 Seat belt warning
- 16 OPSS warning

Easily adjustable suspension seat

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

Full-floating headguard

Anti-vibration rubbers, installed between the cabin structure and truck frame, reduces vibrations and noise while driving. This reduces operator's fatigue and increases safety.

Endurance & Safety

Strong overhead guard

The safety overhead guard meets EEC and ANSI regulations and protects the operator during hazardous jobs.

Parking Brake

Toggle type parking brake requires less efforts from the operator to set.

Ground clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect valuable components during operations on rugged surface.

Highly Durable Electric Power-Shift Transmission

Powershift transmission provides you with fast but quiet travel speed under all heavy load conditions. So boosting your work efficiency.

Safety through high durability!

Safety and durability are priorities in the design of the equipment.

Large Footstep & Handle

Wide "open" step offers convenience and safety when entering and exiting your truck.

■ Photo may include optional equipment.

Heavy duty single unit frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

Easy access to electric parts

Various electric parts are centralized below the dash board resulting in improvement of maintenance.

Expansion bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust gas system to extend the life span.

Fuel tank safety valve

Integrated safety check valve shuts the fuel supply in the unlikely condition of a truck overturn.

Bright, protected headlights

Bright, protected headlights and rear working light are positioned for exceptional visibility in dark environments.

Durability & Easy Maintenance

Electrically Monitored Air Filter

An air cleaner sensor alerts the operator of a restricted air filter so allowing replacement before a potential engine damage occurs.

Transparent air pre-cleaner

Efficient, accessible pre-cleaner providing a longer engine life.

Brake fluid reservoir

Highly visible and accessible reservoir makes daily inspections a quick and easy job.

An accessible, compact fuse box for easy inspection

Centralized design for easy service!

An ideal arrangement of components ensures easy access and convenience during maintenance.

Battery master switch

Key-locking fuel cap

Automatic Self Locking Gas Spring

Engine compartment hood is kept open by a self locking gas spring to improve maintenance safety.

Large tool box

Additional tool box located under footstep for operator's convenience.

Easy Change of Air Cleaner

The air filter is readily accessible for cleaning or replacement.

■ Photo may include optional equipment.

Large Open Engine Hood

Highly accessible engine compartment assures fast and efficient maintenance.

Engine oil condition check

Easy-to-access reservoir tank

Maintenance free battery

Easy-to-change radiator

Easy-to-change fuel filter

Highly accessible engine compartment enabling quick replacement of filters.
