

A versatile shape-shifter

The cleverly-angled Bulk Pulverizers efficiently separate rebar from concrete in the secondary reduction stage.

Optional 360° endless hydraulic rotation allows optimal positioning and precise handling.

Faster working cycles thanks to the integrated speed valve.

Full hydraulic cylinder protection thanks to the piston rod guard.

Tooth plate is replaceable for easy maintenance.

Cutting blades are both replaceable and reversible.

The Bulk Pulverizers' smart design also makes them ideal for primary demolition of ceilings and walls.
