

**BOMAG hand guided double vibratory rollers.**  
Featuring high-output double vibration.

# BOMAG BW 65 H and BW 75 H.

## Extra double vibratory compaction

BOMAG hand guided double vibratory rollers are designed for use on asphalt, granular and soil materials. They are popular choices for work on estate roads, hard shoulders, patching, footpaths, yards, drives, forecourts, playgrounds and sports facilities, as well as on agricultural roads and forestry tracks.

The proven BOMAG double vibration system generates synchronised vibration in each drum to produce uniquely quiet and smooth operation, added traction and uniform surface quality. In combination with a mechanical vibration drive and massive centrifugal force, the compaction performance of these units is legendary.

Hydrostatic travel drive produces easy handling, smooth speed control and high top travelling and working speeds.

BOMAG BW 65 H and BW 75 H. Featuring the unique double vibratory system.

The CE-compliant and height adjustable steering rod offers ultimate safety and ease of operation.

Side clearance allows precise rolling especially at mat edges.

Electric start and crank handle are standard items which minimise down-time risks.

Cheap to run with fast easy-access servicing.

Consistent compaction results on asphalt ...

## Benefits at a glance.

### Added cost-efficiency:

- High travel and working speed (infinitely variable)
- Legendary compaction performance
- Proven componentry
- Low running and servicing costs
- Service kits
- 3-2-1 warranty

### Easy handling and outstanding compaction:

- Unique double vibration (both drums vibrate)
- Hydrostatic travel drive
- Quiet and smooth running
- Easy handling
- Height adjustable and vibration-absorbing steering rod

### Higher utilisation:

- Wide range of applications
- Water sprinklers as standard

... and earthworks.

### Experience and expertise combined:

Superior compaction, gradeability and reliability.
